

ORDINANCE NO. 23

SANITARY SEWER SYSTEM

23
AN ORDINANCE PRESCRIBING RATES CHARGED USERS OF THE SANITARY SEWER SYSTEM BY THE TOWN OF BEASLEY; CONNECTION CHARGES; RULES AND REGULATIONS CONTROLLING THE COLLECTION SYSTEM; REGULATING THE MAKING OF CONNECTIONS TO THE CITY LINES; PROHIBITING THE TAMPERING WITH MANHOLES, CLEANOUTS, COLLECTION LINES, TREATMENT PLANT OR ANY PART OF THE SANITARY SYSTEM; PROVIDING FOR THE RECORDING OF SERVICE CONNECTIONS; REQUIRING A PERMIT TO CONNECT; GOVERNING THE INSTALLATION OF SERVICE LINES; COMPULSORY CONNECTION AND USE OF CITY WATER AND SEWER SYSTEM; PROVIDING A PENALTY FOR THE VIOLATION HEREOF A FINE OF NOT MORE THAN TWO HUNDRED DOLLARS (200.00); PRESCRIBING A SAVING CLAUSE; PROVIDING THAT ALL OF THE PROVISIONS OF THE ORDINANCE SHALL BE DEEMED TO BE INCORPORATED IN EVERY CONTRACT BETWEEN THE TOWN OF BEASLEY AND EACH AND EVERY CUSTOMER AND THAT SUCH CUSTOMERS SHALL BE CHARGED WITH KNOWLEDGE OF THE PROVISIONS OF THIS ORDINANCE AND PROVIDING THAT THIS ORDINANCE BECOMES EFFECTIVE UPON PASSAGE.

WHEREAS, it is advisable and necessary that the residents of the City of Beasley connect with the City sanitary sewer system in order to preserve the public health and public welfare.

WHEREAS, the Town of Beasley is installing a municipal sanitary sewer system within the town limits of the Town of Beasley; and

WHEREAS, the Town of Beasley has borrowed funds from the Farmers Home Administration and Public Law 92-500 Grant from E P A for the installation of the municipal sanitary sewer system; and

WHEREAS, the Board of Aldermen of the Town of Beasley find that it is necessary and desirable to provide reasonable rules, regulations and charges for the municipal sanitary sewer system; and

WHEREAS, the succeeding provisions of this ordinance after investigation by the Board of Aldermen of the Town of Beasley, have been found to be reasonable rules and regulations for the conduct of such Sanitary Sewer System;

NOW THEREFORE

BE IT ORDAINED BY THE BOARD OF ALDERMEN OF THE TOWN OF BEASLEY, TEXAS:

SECTION 1. Definitions • For the purposes of this article, the following words and phrases shall have the meanings respectively ascribed to them by this section:

B.O.D. "B.O.D." (denoting biochemical oxygen demand) shall mean the quantity of oxygen utilized in the biochemical oxidation of organic matter by standard methods procedure in five days at twenty degree centigrade expressed in parts per million by weight.

Building (house) drain • "Building (house) drain" shall mean that part of the lowest horizontal piping of a drainage system which receives the discharge from soil, wastes, and other drainage pipes within the walls of the building, and conveys it to the building sewer, beginning three feet outside the inner face of the building wall of foundation.

Building (house) sewer • "Building (house) sewer" shall mean the extension from the building drain to the sewer lateral at the property line or other lawful place of disposal.

City shall mean City or Town of Beasley.

Domestic sewage • "Domestic sewage" shall mean water borne wastes normally discharging from the sanitary conveniences of dwellings (including apartment houses and hotels), office buildings, factories and institutions, free from storm surface water and industrial wastes. "Normal" domestic sewage shall mean "normal" sewage for Beasley, in which the average concentration of suspended materials and five-day B.O.D. is established at 200 parts per million each, by weight, on the basis of the normal daily contribution of 17 hundredths pounds per capita, per 100 gallons.

Garbage. "Garbage" shall mean solid wastes from the preparation, cooking and dispensing of food, and from the handling, storage, and sale of produce.

House lateral. "House lateral" or Service Connection shall mean the extension from the public sewer main to the nearest property or easement line.

Industrial wastes. "Industrial wastes" shall mean all water borne solids, liquids, or gaseous wastes resulting from any industrial, manufacturing or food processing operation or process, or from the development of any natural resource, or any mixture of these with water or domestic sewage as distinct from normal domestic sewage.

Meter. "Meter" shall mean water connection or sanitary sewer connection.

Paved. The term "paved" is defined as any concrete pavement of Portland cement or asphaltic concrete base pavement, concrete driveway, walk, curb or gutter and all types of pavement having native stone, crushed rock, or gravel base.

Ph. "Ph" shall mean the logarithm (base 10) of the reciprocal of the hydrogen ion concentration of a solution.

Permittee. "Permittee" shall mean that person applying for a permit to construct a sanitary sewer main or connect to an existing sanitary sewer outside the city.

Properly shredded garbage. "Properly shredded garbage" shall mean the wastes from the preparation, cooking and dispensing of food, exclusive of egg shells, bones, etc., that have been shredded to such degree that all particles will be carried freely under the flow conditions normally prevailing in public sewers, with no particles greater than one-half inch in any dimension.

Public sewer. "Public sewer" shall mean a sewer in which all owners of abutting properties shall have equal rights, and is controlled by public authority.

Rigid base pavement. The term "rigid base pavement" is defined as any concrete pavement of Portland cement or asphaltic concrete base pavement, concrete driveway, walk, curb or gutter.

Sanitary sewer. "Sanitary sewer" shall mean a public sewer which carries sewage and to which storm, surface and ground water are not intentionally admitted.

Sewage treatment plant. "Sewage treatment plant" shall mean any city owned facility, devices and structures used for receiving and treating sewage from the city sanitary sewer system.

Sewage; "Sewage" shall mean a combination of the water-carried wastes from residences, business buildings, institutions and industrial establishments.

Sewage works. "Sewage works" shall mean all facilities for collecting, pumping, treating and disposing of sewage.

Sewer. "Sewer" shall mean a pipe or conduit for carrying sanitary sewage.

Standard methods. "Standard methods" shall mean the laboratory procedures set forth in the latest edition, at the time of analysis, of Standard Methods for the Examination of Water and Sewage, as prepared, approved and published jointly by the American Public Health Association, the American Water Works Association and the Federation of Sewage and Industrial Wastes Associations.

7
Storm sewer, storm drain. "Storm sewer" or "Storm drain" shall mean a sewer which carries storm and surface waters and drainage, but excludes sewage and polluted industrial wastes.

Superintendent. "Superintendent" shall mean the superintendent of the water department of the city, or his authorized deputy, agent or representative.

Suspended solids. "Suspended solids" shall mean solids that either float on the surface of, or are in suspension in water, sewage or other liquids; and which, in accordance with standard methods, are removable by laboratory filtering.

Unpolluted water or waste. "Unpolluted water or waste" shall mean any water or waste containing none of the following: Free or emulsified grease or oil; acid or alkali; phenols, or other substances imparting taste and odor in receiving water; toxic poisonous substances in suspension, colloidal state or solution; and noxious or odorous gases. It shall contain not more than ten parts per million each of suspended solids and B.O.D. The color shall not exceed fifty parts per million.

Usage. "Usage" shall mean sanitary sewer service, same as metered water used.

SECTION 2. All rates for sewer service shall be uniform and equal as they apply to the separate classes of service and no free service shall be granted.

~~SECTION 3.~~ Initial connections, contracted for prior to the letting of the contract for the installation of the sewer system shall be made by the town. Service connections shall be brought to the property line. After awarding of the initial construction contract, connections may be made on application to the town water department. All cost will be computed by the town and borne by the applicant. No connections will be authorized unless contracted for by the town.

At the time of applying for sewer service, an initial deposit of \$20.00 for a 4" service connection and \$50.00 for a 6" service connection will be required. In the event such service increases to a point where such deposit is not equal to the charges for an average two month period, the required deposit may be increased to confirm thereto.

SECTION 4. Rates for sewer Service are based on water consumed as registered on each customers meter. The following rates per month shall be the rates charged for Sanitary Sewer Service to water consumers within the corporate limits of the town of Beasley.

First 5000 Gallons
All over 5000 Gallons

\$7.50 Minimum
0.50 per 1000 Gallons or
0.05 per 100 Gallons or
fraction thereof

For all service in excess of fifteen (15) days in each calendar month, a full monthly minimum charge plus usage shall apply. For fifteen (15) days or less in each calendar month a charge of fifty (50) percent of the minimum or \$3.75 plus usage over 2500 gallons will be made.

In all cases where more than one living or business unit is supplied through one meter, a minimum charge will be made for each living unit or business unit supplied through such meter. Minimum gallonage applies to each meter and not to the individual living or business unit.

SECTION 5. The rates and charges described herein shall be due and payable to the Town of Beasley Water Department Treasurer on or Before the 10th day of each month. In the event such payment is not made in full by such due dates, a penalty of 10% of the amount due and payable shall be added to such rates and charges.

SECTION 6: All bills shall be considered rendered when sent to the customer. Failure to receive any such bill by any consumer shall in no manner relieve such consumer of the duty and necessity of paying for sewer service furnished under the terms herein specified.

SECTION 7. In the event, any consumer of sewer service furnished by the town does not pay the rates and charges plus the penalty on or before the end of the month the same are due, the town shall have the authority to disconnect or terminate or cause to be disconnected or terminated all sewer services furnished such consumer.

SECTION 8. Any Consumer of the sewer services furnished by the town, who's sewer services have been disconnected or terminated for non-payment of the rates and charges therefore, may have such sewer services resumed, by paying all rates, charges, and penalty due by him to the town. In addition a reconnection fee equal to the initial connection fee as set forth in Section 3 will be made.

SECTION 9. Service will not be disconnected from occupied premises except under the provisions of Section 7 or upon approval by the Board of Aldermen.

SECTION 10. All extensions to the sewer system shall be determined by the Board of Aldermen, and all lines constructed and meters installed shall become the property of the Town of Beasley.

SECTION 11. SERVICE LINES

- A. Service line is defined as the sewer from the foundation of the house or commercial building to the sewer main line.
- B. Only one service line connection to the Town's sanitary sewage collection system is permitted for each residence or commercial building.
- C. Only the following types of pipe and fitting materials are approved for constructing service lines. Pipe and fittings in each individual service line will be of identical material.
 1. Vitrified clay pipe conforming to ASTM Specification C200 or C278 with joint coupling conforming to ASTM Specification C425.
 2. Cast iron soil pipe, standard weight, conforming to ASTM Specification A74 with rubber gasket joint coupling conforming to ASTM Specification C564.
 3. Poly-vinyl-chloride (PVC) pipe, (Type 1, Grade 1, material conforming to ASTM Specification D1784), manufactured in accordance with Commercial Standards PS-22-70. Use PVC 1120, SDR 32.5 with rubber gasket joints, or SCH. 40 PVC Solvent - weld joint pipe.

4. Acrylonitrile-butadiene-styrene (ABS) pipe, (Type 1, Grade 1, or Type IV, Grade 1, material conforming to ASTM Specification D1788), solvent-weld joints, manufactured in accordance with ASTM Specification D2751 but having minimum wall thickness as follows:

- a. 4 - inch pipe -----0.150 inch + 0.010
- b. 6 - inch pipe-----0.210 inch + 0.010

D. Sizes of service lines shall be as follows:

- 1. Residential -----4 inches in diameter
- 2. Commercial -----6 inches in diameter

E. Minimum grades for service lines shall be as follows:

- 1. 4-inch pipe---one foot drop per hundred feet (1%)
- 2. 6-inch pipe---six inches drop per hundred feet (0.5%)
- 3. 8-inch pipe---four inches drop per hundred feet (0.33%)

F. Maximum grades for service lines shall be as follows:

- 1. 4-inch pipe--- two and one-half feet drop per hundred feet (2.5%)
- 2. 6-inch pipe---one and one-half feet drop per hundred feet (1.5%)
- 3. 8-inch pipe---one foot drop per hundred feet (1%)

G. Construct service lines to true alignment and grade. Warped and sagging lines will not be permitted.

SECTION 12. CONNECTION OF BUILDING SEWER OUTLET TO SERVICE LINES

- A. Building tie-on connection will be made directly to the stub-out from the building plumbing at the foundation on all waste outlets.
- B. Water-tight adapters of a type compatible with the materials being joined will be used at the point of connection of the service line to the building plumbing. No cement grout materials are permitted.
- C. Existing "wye" and stack connections must be utilized for connection of the service line to the sewer main unless an exception is permitted by the Superintendent.

SECTION 13. FITTINGS AND CLEANOUTS

- A. No bends or turns at any point will be greater than 45 degrees.
- B. Each horizontal service line will be provided with a cleanout at its upper terminal; and each such run of piping which is more than ninety (90) feet in length will be provided with a cleanout for each ninety (90) feet or fraction thereof, in the length of such piping.

C. Each cleanout will be installed so that it opens in a direction opposite to the flow of the waste and, except in the case of "wye" branch and end-of-the-line cleanouts, cleanouts will be installed vertically above the flow line of the pipe.

D. Cleanout will be made with air-tight mechanical plug.

SECTION 14. CONNECTION PERMIT

A. A permit must be obtained from the Superintendent at the beginning of construction of the service line. (Permit form to be used by applicant for sewer service is available from the Superintendent)

B. When the service line is complete, and prior to back-filling the pipe trench, the applicant for sewer service will request an inspection of the installation. Request for inspection will be made to the Superintendent. Twenty-four hours (24) advance notice, for the inspection, will be given to the Superintendent.

C. The physical connection to the city's sewer main will be made by use of an adapter of a type compatible with materials being joined. The connection shall be water-tight. No cement grout materials are permitted.

D. Backfilling of service lines trench must be accomplished within twenty-four (24) hours of inspection and approval. No debris will be permitted in the trench.

SECTION 15. EXCLUDED FLOW AND WASTE

A. No waste material which is not biologically degradable will be permitted to discharge into the city sewerage facilities, including mud and debris accumulated during service line installation.

B. No downspouts, yard or street drains, or gutters will be permitted to be connected into the city sanitary sewer facilities.

C. Swimming pool connections will not be made to the city's sewer system unless approved by the Board of Aldermen.

SECTION 16. Failure to adhere to the preceding construction regulations will occasion a fine of Fifty Dollars (50.00) per violation to be paid by the owner to the city.

SECTION 17. Management of sanitary sewers and sewage treatment; records. The city sanitary sewers and sewage treatment shall be under the control and management of the superintendent of the waterworks department, and the superintendent of the waterworks department shall make and keep a complete transcript of the records of the sanitary sewers and sewage treatment.

SECTION 18. Connection permit--Issuance by superintendent of waterworks department; plumbing permit prerequisite to issuance. It shall be the duty of the superintendent of the waterworks department to issue all permits for sewer connections.

Before making connection with any sewer, the builder or plumber shall make application for a plumbing permit with the office of the building inspector in the public works department. This application shall give the exact location of the property, the name of the owner and the name of the person employed to do the plumbing work.

SECTION 19. Same--Authority to revoke prior to completion of work. All permits to connect with sewer shall be given upon the express condition that the superintendent of the waterworks department may, ~~any~~ any time before the work is completed or the sewer is connected to the city's sanitary sewer system, revoke and annul the same, and no party interested shall have any right to claim damages in consequence of such permits being revoked or annulled.

SECTION 20. Compliance with platting requirements prerequisite to connection. It shall be unlawful to service or connect any lot, tract, or plat of land, or any part thereof, or for the use of the owner or purchaser of such land, or any part thereof, with sewer connection or service unless and until such plan, plot or re-plot of such lot or tract of land shall conform to the platting requirements of the city and has been approved by the city plan commission.

SECTION 21. Injuries to sewer system generally; notice before laying pipe in streets. No person shall injure, break or remove any portion of any manhole, lamphole or any part of the city's sanitary sewer system, and when any person shall desire to lay or drive any pipe in any of the streets upon which sewers are laid, they shall give at least a twenty-four hour notice to the superintendent of the waterworks department.

SECTION 22. Connection of gutters, cisterns, privies, etc. No person shall connect any open gutter, rainwater conductor, privy, vault or cistern with any public sewer, or with any private sewer connecting with a public sewer.

SECTION 23. Deposit or discharge of certain waste materials into storm sewers, sanitary sewers, storm drains prohibited. It shall be unlawful for any person, either as owner, tenant, employee, plumber or contractor, to do any of the following acts:

(1) To deposit any garbage, offal, dead animals, filth or any substance or article having a tendency to obstruct the flow of sewage, in any manhole, lamp-hole or sewer openings.

(2) To remove the top of a manhole or break into a manhole to permit drainage of ground or surface water into the sewerage system, or for any other purpose.

SECTION 24. Certain acts declared unlawful. It shall be unlawful for any person to do any of the acts designated in this article except as provided in this article, or to uncover any sewer for any purpose, or to make connection therewith, or uncover the public connection branches thereof, unless by consent and under the supervision of the superintendent of the waterworks department or his duly authorized representative, whose duty it shall be to insure full compliance with the provisions of this Code pertaining to connections, and a failure of duty in this respect shall subject such superintendent of the waterworks department or his

representative to all the penalties of this Ordinance.

SECTION 25. Connections to comply with article and plumbing regulations. It shall be unlawful for any person to make or cause to be made any sewer connection, except as provided in this article and chapter providing rules for the regulation of plumbers.

SECTION 26. Compulsory connection--Use of city water and sewer system. All residential, business, industrial, and other having sewage must connect to the sanitary sewer system and also must connect to the city water system.

SECTION 27. Same--Notice: compliance with notice. It shall be the duty of the superintendent of the waterworks department to notify the owner or occupant of every building situated to make closet connections with the city's sanitary sewer and any such owner or occupant of any building so situated, who shall fail to make at least one water closet connection with the city's sanitary sewer within thirty days after receipt of such notice from the superintendent of the waterworks department, or who shall fail to have such water closets suitably arranged for the use of a urinal, unless separate urinal is provided, shall be deemed guilty of a misdemeanor.

SECTION 28. Connections to be made by city at cost of owner ; plumber to install building sewer. Connections with the city's sanitary sewer shall be made by the waterworks department or his representative make such a connection. All connections will be made by the waterworks department at the expense of the property owners. The water department will construct the house lateral, or service connection, from the city sewer main to the nearest property or easement line, and the owner will install the building sewer from the building drain to the lateral, or service connection.

SECTION 29. Installation of buuilding sewer generally; inspection of same. The building sewer shall be constructed in accordance with the provisions of Section 11 covering methods and material for building sewer construction. Such building sewers will be subject to inspection and approval by the city water works. The water department shall refuse to connect to the sanitary sewer system any building sewer not meeting requirements of Section 11 as to workmanship and materials. To assure such quality of workmanship, the plumbing inspector shall have performed such water or infiltration tests as necessary to assure a tight and well constructed building sewer.

SECTION 30. Certain wastes prohibited in sanitary sewers.

(a) No person shall discharge, or cause to be discharged, any storm water, ground water, roof run-off, sub-surface drainage, down spouts, yard drains, yard fountains and ponds, or lawn sprays into any sanitary sewer. Water from swimming pools, unpolluted industrial water, such as boiler drains, blow-off pipes or cooling water from various equipment, shall not be discharged into sanitary sewers if a closet storm sewer is available. If a closed storm sewer is not available, it may be discharged into the sanitary sewer by an indirect connection whereby such discharge is cooled if required, and flows into the sanitary sewer at a rate not in excess of three gallons per minute; provided, that the waste does not contain materials or substances in suspension or solution in violation of the limits prescribed by this article.

(b) No person shall discharge, or cause to be discharged, into any public sewer any of the following described substances, materials, water or wastes:

(1) Any liquid or vapor having a temperature higher than one hundred and fifty degrees Fahrenheit (sixty-five degrees Centigrade).

(2) Any water or wastes which contain wax, grease or oil, plastic or other substance that will solidify or become discernibly viscous at temperatures between thirty-two degrees to one hundred and fifty degrees Fahrenheit.

(3) Flammable or explosive liquid, "solids or gas", such as gasoline, kerozene, benzeine, naphtha, etc.

(4) Solid or viscous substances in quantities capable of causing obstruction to the flow in sewers, or other interference with the proper operation of the sewage works such as ashes, cinders, sand, mud, straw, shavings, metal, glass, rags, feathers, tar, plastics, wood, whole blood, paunch manure, hair and fleshings, entrails, lime slurry, lime residues, slops, chemical residues, paint residues or bulk solids.

(5) Any garbage that has not been properly comminuted or shredded. If properly comminuted or shredded, then it may be accepted.

(6) Any noxious or malodorous substance which can form a gas, which either singly or by interaction with other wastes, is capable of causing objectionable odors; or hazard to life; or forms solids in concentrations exceeding limits established in this article: or creates any other condition deleterious to structures or treatment processes; or requires unusual provisions, attention, or expense to handle such materials.

(c) Except in quantities, or concentration, or with provisions as stipulated herein, it shall be unlawful for any person to discharge waters or wastes to the sanitary sewer containing:

(1) Free or emulsified oil and grease exceeding on analysis an average of 100 parts per million (833 pounds per million gallons) of either or both or combinations of free or emulsified oil and grease, if, in the opinion of the superintendent, it appears probable that such wastes:

a. Can deposit grease or oil in the sewer lines in such manner as to clog the sewers;

b. Can overload skimming and grease handling equipment;

c. Are not amenable to bacterial action and will therefore pass to the receiving waters without being affected by normal sewage treatment processes; or

d. Can have deleterious effects on the treatment process due to the excessive quantities.

(2) Acids or alkalis which attack or corrode sewers or sewage disposal structures, or have a pH value lower than 5.5 or higher than 9.5

(3) Salts of the heavy metals, in solution or suspensions, in concentrations exceeding the following:

Chromium as Cr.....	3 parts per million
Copper as Cu.....	3 parts per million
Zinc as Zn.....	3 parts per million
Nickel as Ni.....	3 parts per million
Cadmium as Cd,.....	3 parts per million

or Elements which will damage collection facilities or are detrimental to treatment processes.

(4) Cyanides or cyanogen compounds capable of liberating hydrocyanic gas on acidification in excess of two parts per million by weight as CN in the wastes from any outlet into the public sewers.

(5) Radioactive materials in a manner which will permit a transient concentration higher than one hundred microcuries per liter.

(6) Materials which exert or cause:

a. Unusual concentrations of solids or compositions; as for example, in total suspended solids of inert nature (such as Fuller's Earth) or in total dissolved solids (such as sodium, chloride, or sodium sulfate);

b. Excessive discoloration;

c. Unusual biochemical oxygen demand or an immediate oxygen demand;

d. High hydrogen sulfide content; or

e. Unusual flow and concentration; shall be pretreated to a concentration acceptable to the city, if such wastes can (a) cause damage to collection facilities, (b) impair the processes, (c) incur treatment cost exceeding those of normal sewage, or (d) render the water unfit for stream disposal or industrial use. Where discharge of such wastes to the sanitary sewer are not properly pretreated or otherwise corrected the superintendent may (a) reject the wastes or terminate the service of water or sanitary sewer, (b) require control of the quantities and rates of discharge of such wastes, or (c) require payment of surcharges for excessive cost for treatment provided such wastes are amenable to treatment by normal sewage plant facilities operated by the city.

SECTION 31. Connection of wash or slop stands; unlawful disposition of slops, etc. It shall be unlawful for any person to refuse or fail to connect all wash stands in his house or yard with the city's sewer, or to allow any slops, wash or waste water of any kind to flow over the pavement, or under the pavement, or into any open gutter, or into the street.

SECTION 32. Indemnity agreement required under certain circumstances. Where, in the opinion of the director of public works or the superintendent of the water-works, the property is subject to flooding or the sanitary sewer is subject to being surcharged due to infiltration or storm waters, or the premises is subject to being flooded by an overcharged sewer due to its elevation in relation to the main sewer line, then the owner or user of the premises shall be denied a connection to the sanitary sewer unless the owner or user agrees to install a check or backflow valve in his house sewer and agrees to indemnify fully the city and

save it whole and harmless from and against any and all damages, costs, or expenses of every kind, character and nature, where real or asserted, accruing upon or about the building due to surcharge of the sanitary sewer. Such agreement shall be excuted by the owner of the property and filed in the deed records of the county, and shall be a covenant running with the land and shall be binding on the owner, his successors or assigns.

SECTION 33. Industrial waste

See industrial waste ordinance

SECTION 34. A violation of any of the above rules and regulations of the Town Water Works as set out in the preceding sections, or a doing or causing to be done by any person or persons, firm, or association, of any of the things or acts forbidden or made unlawful in any of the preceding sections, shall be deemed to constitute a violation under the terms of this ordinance and an offense, and shall be punishable as such; and for each and every violation of the terms of this ordinance, the person, firm, association or corporation shall upon conviction thereof in the Municipal Court, be subject to a fine of not more than Two Hundred Dollars (\$200.00), and each violation and each day there is a failure to comply with the terms of this ordinance shall constitute a separate offense.

SECTION 35. If any section, part of section or provision of any section of this ordinance shall be held to be void, ineffective or unconstitutional for any cause whatsoever, it shall not effect the validity of the remaining parts of this Ordinance. The Board of Aldermen hereby declares that it would have passed the remaining parts of this Ordinance if it had known that such part or parts thereof would be declared invalid.

SECTION 36. All of the provisions of this ordinance shall be deemed to be incorporated in every contract between the Town water works and its consumers, and each consumer shall be charged with knowledge of the provisions of this ordinance and, by applying and accepting sewer from the Town Water Works, to have assented to the provisions hereof.

SECTION 37. This ordinance shall take effect and be in full force and effect from and after its passage and publication as required by law.

Passed and approved this 29 day of April, 1975.
